

# The integrated platform for social organisations.

Collect, visualize and instantly share project data within your team or beyond.

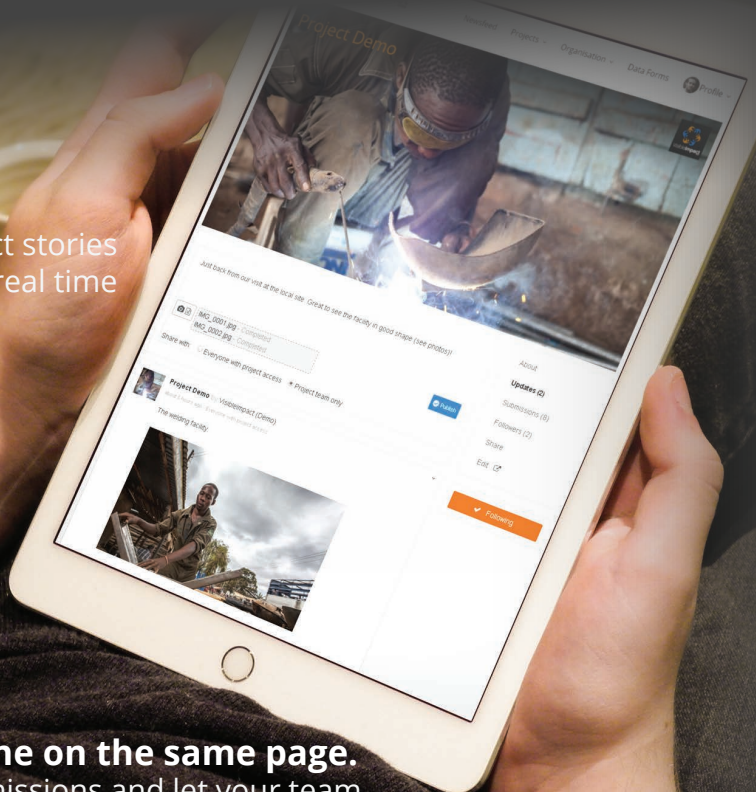

VisibleImpact is easy to use, affordable and works from the field and the office.

**Monitoring projects can be hard.** Organisations have to use multiple and disconnected tools to keep track of projects, collect data and report their impact. Team members find it difficult to follow remote projects. Documentation, status updates and important data is often outdated or not accessible. When it comes to sharing data with partner organisations, investors or donors, things get even more complicated.

**With VisibleImpact, this finally changes.** Data is collected digitally from the field and the office. It is stored in a central location from where it can be instantly accessed, visualized and shared with a defined audience. Real time project and data visibility helps you make the right decisions and maximize your impact.

Share project stories  
and data in real time

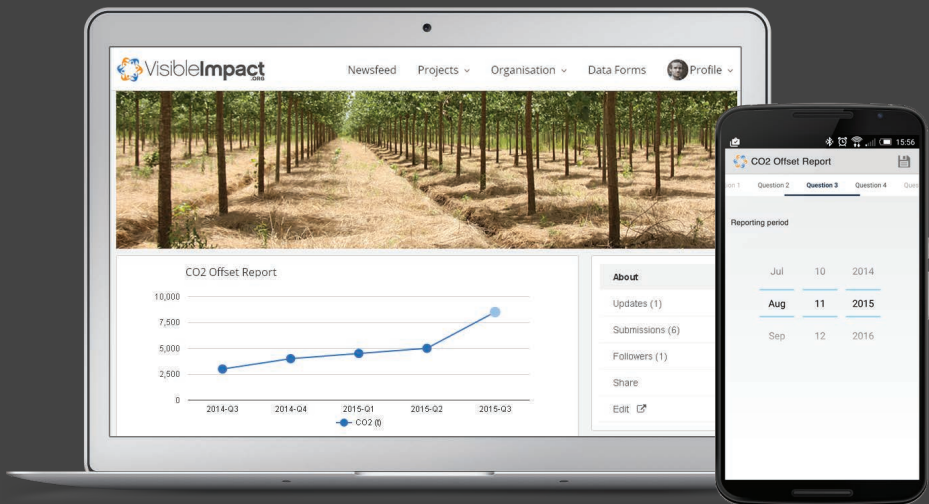

**Keep everyone on the same page.** Set access permissions and let your team, partners or the public follow projects. Updates, documents and data are instantly shared to personal newsfeeds, project pages and data dashboards.

**Enter data from any location.** Build customized forms for impact reports or field surveys. Data can be collected via browser and mobile app, even in remote locations without network coverage. The forms can be translated into any language and can gather different types of data including text and numbers, locations, photos, signatures or NFC values.

**Visualize data in real time.** Filter and analyze data across projects and forms. View values as key indicators or on graphs, charts and interactive maps.

**Access data from anywhere.** Display projects and data records on VisibleImpact or embed them into your website. Use the API to seamlessly integrate VisibleImpact into your IT infrastructure.

Enter and instantly visualize project data

**Get your tailor-made solution.** We can help you to extend VisibleImpact and develop customized software integrations, such as dedicated dashboards, interactive maps and pages with your branding and layout.

VisibleImpact is free for small teams. Premium features start at only USD \$65 per month. Full training and support is available.
